SUMMARY

Results-driven Frontend Developer with hands-on experience building secure, role-based web applications using React.js, JavaScript, and RESTful APIs. Solid foundation in Data Structures & Algorithms. Proficient in MySQL, Firebase Authentication, and Git version control. Seeking to leverage full-stack development skills to deliver scalable, well-documented solutions in a collaborative engineering environment.

WORK EXPERIENCE

Centillion Networks Private Limited | Trainee Telecom Engineer Nov 2024 – Dec 2025

- Engineered a React.js-based internal workflow dashboard supporting end-to-end project and timesheet management for cross-functional teams.
- Implemented Firebase Authentication and JWT-based secure login, ensuring zero unauthorized access across all dashboard routes.
- Architected role-based access control (RBAC) system to dynamically restrict user permissions — reducing access violations by 100%.
- Developed and integrated 10+ RESTful APIs to fetch, update, and manage project and timesheet data, improving data retrieval efficiency.
- Built protected routes using React Router and managed global application state via React Hooks and Context API.
- Designed complete timesheet workflow handling status transitions (Pending → Approved → Rejected), reducing manual processing steps.

Prodigy Infotech

January 2025

Web Development Intern [Link](#) **STOPWATCH** | **TICTACTOE** | **WEATHER APP**

- Developed 3 responsive web applications (Stopwatch, Tic-Tac-Toe, Weather App) using HTML5, CSS3, and JavaScript.
- Integrated OpenWeather RESTful API to fetch and render real-time weather data with dynamic UI updates.

PROJECTS

Workflow Management Dashboard | React.js, Firebase Auth, RESTful API, JavaScript, Git

- Designed modular dashboard architecture with protected routes, reusable components, and dynamic role-based navigation.
- Integrated Firebase Authentication for secure login and RESTful APIs for real-time project and employee data management.
- Implemented Context API for global state management, eliminating prop-drilling across 10+ nested components.

Restaurant Responsive Web UI | HTML5, CSS3, JavaScript

- Built fully responsive multi-device UI (desktop, tablet, mobile) with custom navigation bar and organized CSS grid layout.
- Optimized UX with semantic HTML5 markup, improving accessibility and page structure compliance.

Ethical Keylogger — Security Research | Python

- Engineered a Python-based keylogger achieving 40% improvement in data capture efficiency with full AES encryption of captured data.
- Implemented automated keyword-based alerting, reducing incident response time by 30% and cutting false alarms by 15%.

EDUCATION

HOLY PRINCE MATRICULATION HIGHER SECONDARY SCHOOL

- | | | |
|--------|-----|-----------|
| • HSC | 81% | 2019-2020 |
| • SSLC | 86% | 2017-2018 |

KCG COLLEGE OF TECHNOLOGY

- | | | |
|---|------|-----------|
| • Bachelor of Engineering(Computer Science) | 8.02 | 2020-2024 |
|---|------|-----------|

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, React Router, Redux, Context API, React Hooks, Django, Tailwind Css

Backend & APIs: RESTful API Design & Integration, CRUD Operations

Databases: MySQL, Firebase, Basic NoSQL concepts

Auth & Security: Firebase Authentication, JWT , Role-Based Access Control

Tools & Platforms: Git, GitHub, Visual Studio Code, Netlify, Postman (API Testing), Vercel
